Introducing the Ustar MultNAT® System

Empowering Health with Innovation

Overview of MultNAT® System

As a game changer in syndromic testing, Ustar introduces its revolutionary MultNAT® System for Point-of-Care (POC) testing:

Scalable to Your Needs

The MultNAT® System offers high throughput and random access, capable of running up to 32 tests concurrently.

Rapid results during patient visits

Lab-grade PCR results in-house

Simultaneous testing of multiple targets

User-friendly with streamlined workflow

Designed Specifically for POC Testing

Rapid Answers:
Fast syndromic results.

Intuitive System Interface:
Designed for use by healthcare personnel in any setting.

Advanced User Management:
Easily set up new operators and manage permissions.

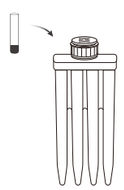

Minimal Maintenance:
Requires only periodic cleaning, no general maintenance.

LIS Integration:
Capabilities for interfacing with Laboratory Information Systems (LIS).

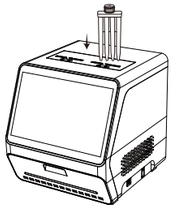

Easy as 1/2/3
